Maine Marijuana Production: Code Requirements with Fire Response & Investigation Considerations

Wednesday June 20, 2018

Augusta Elk's Lodge

397 Civic Center Drive

Augusta, ME 04330

Presented by

***Maine Chapter of the
International Association of***

P.O. Box 1101 Auburn, ME 04211-1101

WWW.MAINEIAAI.COM

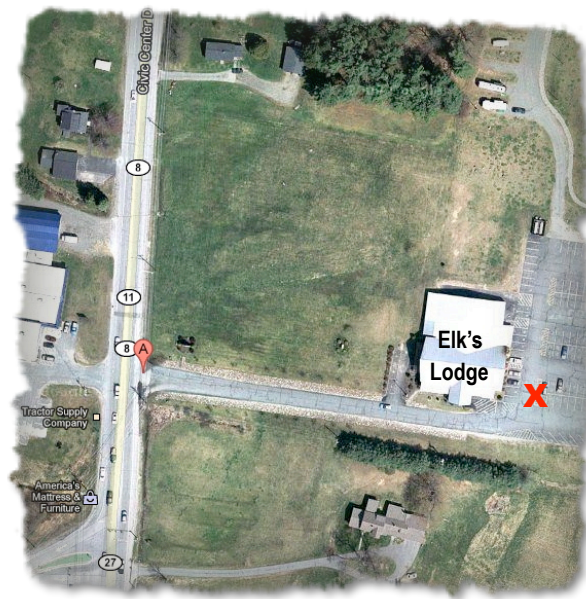

Speakers:

Rich McCarthy - Assist. State Fire Marshal
Maine Fire Marshal's Office

Chip Woodman, Jr. - Sgt. Kennebec County
Sheriff's Office assigned to MDEA as a
Supervisor

Program:

With recent legalization of the recreational use of marijuana throughout the nation, including Maine, the marijuana industry is poised for the rapid expansion of grow and extraction facilities. As is the case with any industrial process, marijuana production comes with an assortment of hazards. This training session will address the hazards associated with growing facilities, high electrical load demands, combustible interior finishes, access and egress barriers in grow operations, CO₂ enrichment, as well as extraction processes using butane, propane and CO₂. Also included in this training will be the perspective of law enforcement regarding the clandestine situations that can have a significant safety hazard to first responders and investigators. In addition, this training will bring attention to the new code chapter of the NFPA 1, Fire Code, Chapter 38 as it relates to building and fire code requirements for cannabis related occupancies.

Message from the Maine Chapter IAAI

The Maine Chapter of the International Association of Arson Investigators was formed in 1992 to further the education and training of fire and arson investigators throughout the State of Maine. The primary goal of the organization is to provide excellent training opportunities for as low a cost as possible to its members. The Directors of the Chapter would like your input as to future training programs you would like to see or any suggested instructors for our programs. Please contact any Director with your needs or suggestions. **Thank You**
